BRITISH MANUFACTURING & ENGINEERING EXPERTISE AT ITS BEST

1800's

W.H.Willcox invented the '[illegible] Wire Bound Hose', later to be recognised as when the 'Co[illegible] Hose' industry was 'born'.

1950s

[illegible] further advanced [illegible] 950s when Compoflex [illegible]pany Limited entered the [illegible]arket and produced the 'Compo[illegible] flexible composite hose', which [illegible]ds its own today.

Shortly after this, Willcox and Compo[illegible] both saturated the U[illegible] market and distribute[illegible] product overseas.

1969

[illegible]

1978

Dantec developed a strong [illegible] with Willcox and quickly [illegible] leading North West distributor, but Dantec began to manufacture composite hose in its own factory.

1988

In order to prove the robust quality of Dantec's products the company became the first ever composite hose manufacturer to achieve Quality Management System BS5750 This ensured customers of the high level of quality control at Dantec's factory production line.

★★★★★

Dantec industrialised and patent the Firesafe Composite Hose. This innovative product reflected Dantec's technical knowledge and expertise as the product covered all types of bespoke Petrochemical, Marine and Industrial applications.

1996

Dantec went on to win a major deal to supply their renowned Firesafe Composite Hose to the Formula One World Championship sport for 15 seasons

Today Dantec dominates the domestic UK market and is a world leader in composite hose technology exporting to more than 50 countries worldwide, producing in excess of over 140,000 metres of composite hose annually. Dantec is an exceptional example of how a UK business is benefiting from the Great British reputation of designing and manufacturing outstanding quality composite hose products with international appeal as the strong brand of Britain carries unrivalled value
